## COMPANY PROFILE

X-ICAD Systems is the market frontrunner in hardcopy X-RAY FILM scanning services, DOCUMENT Management and Off-Site storage in the Occupational Health industry. Established in 2004, we specialize in this field, and have the experience to effectively preserve your records with the necessary quality required.

X-ICAD makes use of the latest radiographic scanners and imaging software, which allows archiving of patient and study data on single media, such as DVDs or External Hard drives. X-Ray image capture is done on or off site and is the primary focus of our business, which provides customers with a cost-effective digital x-ray archive with a guaranteed path to a film less environment. In addition, healthcare organizations that have a need to extend their imaging program to include medical surveillance documents, X-ICAD's digital document solutions, cover all aspects of document and records management. This is especially useful in departments where medical surveillance records need to be kept for an extensive time period.

In order to meet the individual needs of our clients, each project / scope of work is personalized to accommodate their requirements as well as budgets. Our employees are highly trained and sign a confidentiality agreement to ensure work is safe and protected.

Functional and quality coupled with extensive industry knowledge, makes X-ICAD Systems, the ideal choice for any client whom has the need to manage their records and take the next step into the world of digital data. By capturing your records, you not only comply to secure them, but preserve them for future use.

X-ICAD specializes in the Occupational Health Industry and has the experience to effectively preserve medical records with the necessary quality required for the duration of 40 years as required by law. Other scanning organizations cannot deliver the service we provide, as medical records are unique in terms of their applicability, storage requirements and the sensitive data it contains. We guarantee a higher quality scanning process, with extensive quality control and the elimination of misfiling. Because of the sensitivity of data relating to any project, all data is treated as confidential and will not be distributed unless so requested by the client.

Our executive team has over 16 years of experience converting hardcopy x-ray's and files allowing clients to move to a paper and film-less environment. We have recognized the need for off-site storage and managing of medical records and x-ray films.

X-ICAD Systems off-site storage facility, offers storage of all medical records with easy access to your information, while ensuring high levels of security are maintained at all times. Storage fees were calculated cost effectively and queries are resolved within 24 hours upon an official request for medical surveillance records.

We are a proud entity with the ability to deliver a range of data management services for all your specific needs.
